

The Acrobat 6 search index for this CDROM has been successfully mounted if there is no error message in response to the mount request.

You can now perform keyword searches using the SEARCH bookmark on the left side of the screen, or using the EDIT / SEARCH menu item of Adobe Reader 6.

When performing a SEARCH, select the checkbox "in the index named INDEX6.PDX".

Please use the bookmarks on the left to navigate this CDROM.

Please read on if previously you saw the error message stating that the Acrobat 5 search index could not be loaded. You will still see this error message each time you view the Welcome page, even though the Acrobat 6 search index is now mounted. To prevent further displays of the error message, go to the Welcome page and select the check box in the error message window.
