NEW SOUTH WALES DIVISION
TECHNICAL MEETING

-Tour of the National Acoustics Laboratory-

The Date: **Wednesday 18th October 2006**

The Venue: **NATIONAL ACOUSTICS LABORATORIES**
126 GREVILLE STREET
CHATSWOOD

The Time: **6.30 pm (sharp) to 8.00 pm**

The National Acoustic Laboratories (NAL) is opening its doors for the AAS and the AES to view its facilities and learn about some of the specialist research it conducts.

NAL has one of the finest acoustic test facilities in the world and has an international reputation for research in the area of hearing loss prevention and hearing loss rehabilitation.

The evening will begin with an overview of NAL given by Dr. Harvey Dillon, Director of Research, followed by a tour which will include viewing the anechoic chambers, diffuse chambers and a demonstration of a new low-noise, high-flow air-delivery system. The air-delivery system has recently been added to the facility for assessing noise generated by air travelling through air-conditioning ducting and other objects.

The tour will also encompass select areas of research including the electrophysiology laboratory and the children's hearing assessment laboratory. A select number of NAL's projects and inventions will be on display. The tour will conclude with light supper and drinks.

RSVP

Monday 16th October 2006 to Rodney Stevens by email

info@rsaacoustics.com.au

if no email available ring Rodney on (02) 9542 7979

'ANYONE' is Welcome to Attend

Supper will be provided
