NOTICE OF TECHNICAL MEETING

AAS Members are invited to the following event

Marine Seismic Survey Acoustic Impact Evaluation and Management

**Thursday March 1, 2018 – 5:00pm for a 5:30pm start
Ground Floor 503 Murray Street Perth**

Despite progress in the industry with evaluation and management of underwater noise within Australian Commonwealth waters, there remain areas for improving the consistency and quality of assessment.

To address this, NOPSEMA have released for comment some draft guidance material on acoustic impact evaluation and management. The scope and purpose of the document is limited and framed to support Environment Plan development under an objective-based regulatory regime.

In this meeting, we invite open discussion of the document and opportunities for improvement, say through developing and standardising approaches for some of the more technical elements.

The presentation is intended for professionals in the field of environmental noise assessment of offshore underwater & marine environments, however all members are welcome.

The event will be held at SLR Perth office, Ground Floor 503 Murray Street Perth. Drinks and pizza will be served before the meeting.

Numbers are strictly limited. Please RSVP to bli@slrconsulting.com should you wish to attend.

The guidance document will be provided on application. Please submit any presentation material you would like tabled prior to close of business on February 28.

Do you have a topic to present or discuss?
