

Senior Acoustic Scientist / Engineer

Brisbane Senior Acoustic Scientist/Engineer

- Assist and learn from a national team of experienced Acoustic Engineers.
- Further their career in Acoustics.
- Work on high profile and exciting projects.
- Work for an accredited Aon Hewitt Best Employer.

ABOUT THE ROLE

Our Brisbane Acoustics team kicked off nearly two years ago with experience in Architectural, Building and Environmental Acoustics, as well as audio technology.

Our experience and reputation has resulted in a strong workload stream, allowing us to grow a sustainable team.

We are looking for a Senior Engineer with 4 to 12 years of the experience in Building Acoustics to join our team. The position is aimed at someone who is able to pick up a project and run with it under minimal supervision. Candidates will preferably come from a background in consulting, however that isn't a prerequisite. Knowledge of software such as Ease, SoundPLAN or CadnaA is advantageous.

The role is Brisbane based, with the majority of tasks being undertaken at the office. Occasional site visits are required, along with flexibility in working hours, as some noise measurements have to be undertaken after-hours.

Both part time and full time roles will be considered, depending on candidate's experience and existing team structure.

DUTIES & RESPONSIBILITIES

- Work primarily in the field of building and architectural acoustics.
- Delivering projects with minimal supervision including project planning, client liaison and provision of advice.
- Undertake site visits and acoustic measurements in the field and lab.
- Be accurate, diligent and professional.
- Participate in meetings with clients and other consultants.
- Report and specification writing.

SKILLS & EXPERIENCE

- Excellent communication and interpersonal skills.
- Bachelor Degree in Acoustics, Audio, Mechanical or Environmental Engineering or Science is preferred. All qualification cases will be reviewed and considered.
- Knowledge of acoustic modelling software such as CadnaA or SoundPLAN will be a plus

Apply for the role at www.wge.com.au/careers

BENEFITS

- Competitive salary package including 9.5% superannuation.
- Bi-annual Profit Share when WGE does well
- Access to Medibank & HBF Insurance Corporate Membership rates
- Reward for high performance
- Bring your personality to work
- Active Social Club
- Training and Development Opportunities
- Career Progression

ABOUT US

Wood & Grieve Engineers (WGE) is an award-winning Australian engineering consultancy built on a strong culture of exceptional customer service and best-practice technical engineering solutions. Our clients can access engineering specialists in all disciplines from civil and electrical to acoustics and sustainability.

Here at WGE our people are what truly sets us apart. Our unique culture has seen Wood & Grieve achieve:

- “Best Employer” accreditation in the prestigious Aon Hewitt Best Employer survey in 2012, 2013, 2014 and 2015, 2016.
- A triple win at the 2015 Financial Review Client Choice Awards, including Best Consulting Engineering Firm (revenue \$50m-\$200m)

With over 480 staff throughout Australia, we have the capability and track record to deliver beyond client expectations on any project.
