

If you are an Acoustical Consultant and would like the opportunity to work from home.....

Lloyd George Acoustics is a Western Australian based consulting firm specialising in the field of noise and vibration. The company is well respected in delivering a quality product in a professional, friendly and timely manner. We have developed a solid reputation with our clients and work in both the private and public sector.

Due to a growing workload, we are looking to employ an experienced acoustical consultant. The position will be full time, however we will consider flexible working hours. The applicant is to have a degree in engineering or science and hold a current drivers license.

Lloyd George Acoustics is structured such that all consultants work from their own home. Therefore the successful applicant must be able to work with minimal supervision.

Key responsibilities would normally include:

- Client liaison - Strong communication skills are required.
- Site measurements - Familiarity with noise and vibration instrumentation.
- Computer modelling - Use of software such as SoundPLAN and Insul.
- Report Writing - Excellent report writing skills is a must.

The majority of our work is focused on:

- environmental noise from industry and the like;
- transportation noise and vibration assessments for road and rail infrastructure providers and for developers who's subdivisions are affected; and
- architectural acoustics, mainly in relation to apartment developments.

Experience in these areas is considered ideal.

Remuneration shall be commensurate with the applicant's experience and qualifications.

Applications should be sent to terry@lgacoustics.com.au
